

Make your emergency stockpile visible with RFID

Emergency supplies: where, how many, until when?

Item-by-item management with the **Emergency Stockpile Management System**

For local governments, companies, schools and community disaster-prevention groups

Do any of these sound familiar?

You can't say right away
what you have and how
many

Stocktaking means
counting
and writing on paper

Supplies expired
before anyone noticed

Simple: just 3 steps

1 Attach tags

Stick RFID labels
on stockpiled items

2 Read in bulk

Point the reader
and press the button

3 Auto-record

Quantity, location and
expiry go to your PC

See it all at a glance on your PC

✓ Items nearing expiry

Never miss the time to replace

✓ Full history

When, who and where items moved

✓ Inventory by site

Manage multiple warehouses

✓ Runs on a single PC

No internet connection needed

KOTOBUKIYA FRONTE
寿屋フロンテ株式会社

1-24-1 Fujiwara-cho, Gyoda-shi, Saitama 361-0016, Japan
MAIL compass@kf-k.co.jp
